Source Code :

```
public class Main {  
    public static void main(String[] args) {  
  
        class node {  
            protected Integer dataNode;  
            protected node ptr;  
  
            public node() {  
                dataNode = null;  
                ptr = null;  
            }  
  
            public node(Integer d, node e) {  
                dataNode = d;  
                ptr = e;  
            }  
  
            public void setData(Integer d) {  
                dataNode = d;  
            }  
  
            public void setPtr(node e) {  
                ptr = e;  
            }  
  
            public Integer getData() {  
                return dataNode;  
            }  
  
            public node getPtr() {  
                return ptr;  
            }  
        }  
  
        class tumpukanGG {
```

```

private node tumpukanGanjil;
private node tumpukanGenap;

public tumpukanGG() {
    tumpukanGanjil = null;
    tumpukanGenap = null;
}

public void push(int data) {
    if (data % 2 == 0) { // Data genap
        tumpukanGenap = new node(data, tumpukanGenap);
    } else { // Data ganjil
        tumpukanGanjil = new node(data, tumpukanGanjil);
    }
}

public Integer popganjil() {
    if (tumpukanGanjil == null) {
        System.out.println("Tumpukan ganjil kosong");
        return null;
    }
    Integer data = tumpukanGanjil.getData();
    tumpukanGanjil = tumpukanGanjil.getPtr();
    return data;
}

public Integer popgenap() {
    if (tumpukanGenap == null) {
        System.out.println("Tumpukan genap kosong");
        return null;
    }
    Integer data = tumpukanGenap.getData();
    tumpukanGenap = tumpukanGenap.getPtr();
    return data;
}

public void cetakganjil() {
    node current = tumpukanGanjil;
    System.out.print("Tumpukan Ganjil: ");
    while (current != null) {
        System.out.print(current.getData() + " ");
        current = current.getPtr();
    }
    System.out.println();
}

public void cetakgenap() {
    node current = tumpukanGenap;
    System.out.print("Tumpukan Genap: ");
    while (current != null) {
        System.out.print(current.getData() + " ");
        current = current.getPtr();
    }
}

```

```

        }
        System.out.println();
    }
}

tumpukanGG a = new tumpukanGG();

a.push(9);
a.push(7);
a.push(10);
a.push(3);
a.push(2);
a.cetakganjil();
a.cetakgenap();

System.out.println("Pop Ganjil: " + a.popganjil());
System.out.println("Pop Genap: " + a.popgenap());

a.cetakganjil();
a.cetakgenap();
}
}

```

Output :

```

/Users/al-birra/Library/Java/JavaVirtualMachines/openjdk-23.0.1/Contents/Home/bin/
Tumpukan Ganjil: 3 7 9
Tumpukan Genap: 2 10
Pop Ganjil: 3
Pop Genap: 2
Tumpukan Ganjil: 7 9
Tumpukan Genap: 10

Process finished with exit code 0

```
